--
Sincerely yours,
The Hestia Control Panel development team

Made with love & pride by the open-source community around the world.

[ ! ] IMPORTANT: The system will now reboot to complete the installation process.
Press any key to continue
```
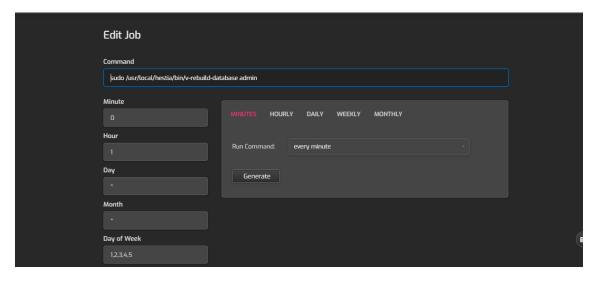

v-update-sys-queue

Esta función es responsable del procesamiento de la cola. Este script maneja reinicios de servicios, copias de seguridad programadas, análisis de registros web y otras operaciones que consumen muchos recursos. Ayuda a optimizar el comportamiento del sistema. En pocas palabras, Apache se reiniciará solo una vez, incluso si se agregan o eliminan 10 dominios.

v-backup-usuarios

Esta función realiza una copia de seguridad de todos los usuarios del sistema.

- Crea una tarea automatizada que reinicie (tras reconstruir las reinicia) las bases de datos de admin todos los días entre semana de madrugada.

- Crea una tarea automatizada que reconstruya todos los sitios web del usuario admin los domingos por la mañana.
